PERSONAL PROJECTS

Online Automobile Rental Service

- Developed an integrated online platform that streamlined the vehicle rental process.
- Resulting in a 20% increase in user bookings and a 15% reduction in manual processing time.
- User can check the real time of their booking status and provide feedback to improve the service.
- Provides with chat and call support in case of emergency.
- Used HTML5, CSS3 and Bootstrap 4 for UI development ,used vanilla js for interaction and api integrations.
- Used PHP for back-end logic implementation and creating service's for the application.
